

HALL TICKET NO	0425046043
NAME	VEPPAREDDY GARI LAVA KUMAR REDDY

AREA CHART :

1. option onto Open your worksheet (your Area Chart is already open).
2. Look at the left sidebar where Pages, Filters, Marks appear.
3. At the top-left panel, find the tabs Data and Analytics.
4. Click Analytics.
5. The Analytics panel opens with options like Forecast, Trend Line, Reference Line, Average Line.
6. Drag the required analytics your chart and drop it.

OUTPUT:

BAR CHART :

1. **Open a new Worksheet** in Tableau.
2. **Drag Region → Rows shelf**
 - This displays regions on the chart.
3. **Drag Sales → Rows shelf**
 - Tableau creates **SUM(Sales)** automatically.
4. **Set Marks type to Bar**
 - In the **Marks** card → select **Bar** (or keep Automatic if already bar).
5. **Drag Ship Mode → Color (Marks card)**
 - This creates stacked color sections inside the bar.
6. **Drag Region → Filters shelf**
 - Select **West** → click **OK** to show only West region.
7. **Format and adjust chart**
 - Edit title to **Bar chart**.
 - Show color legend and resize the bar if needed.

OUTPUT

BOX PLOT CHART :

1. Open a new Worksheet in Tableau.
2. Drag Discount → Columns shelf to create the horizontal axis.
3. Drag Segment → Rows shelf to display categories.
4. Drag Region → Rows shelf beside Segment for regional comparison.
5. Open Show Me → Select Box-and-Whisker Plot to generate the box plot.
6. Format the chart by adjusting labels, title, and tooltip for better presentation.

OUTPUT :

Buttons → Drag **Order Until Ship** to **Size** and **Ship Mode** to **Color**

Dashboard → Adjust colors, labels, spacing, and fit the chart

1. **Connect Data** → Open Tableau and connect to the dataset.
2. **Add Columns** → Drag **Order Date** to **Columns** and change it to **Week**.
3. **Add Rows** → Drag **Sub-Category** and **Ship Mode** into **Rows**.
4. **Create Gantt View** → In **Marks**, select **Gantt Bar** chart type.
5. **Apply Measures** → Drag **Order Until Ship** to **Size** and **Ship Mode** to **Color**.
6. **Format Dashboard** → Adjust colors, labels, spacing, and fit the chart for clear visualization.

OUTPUT :

HEAT MAP :

1. Connect Data → Open Tableau and load the dataset.
2. Create Columns → Drag Segment into the Columns shelf.
3. Create Rows → Drag Region and Sub-Category into the Rows shelf.
4. Build Heat Map → Select Show Me → Heat Map or keep Marks → Automatic/Square.
5. Apply Measures → Drag Profit to Color and Sales to Size.
6. Add Filter & Format → Drag Region to Filters, adjust color scale, labels, and chart size.

OUTPUT :

— BUILDERS —

HISTOGRAM CHART :

1. Create Bins

- Right-click **Quantity** → **Create** → **Bins**
- Choose bin size (e.g., 1) → **OK**

2. Build Histogram

- Drag **Quantity (bin)** to **Columns**
- Drag **Quantity** to **Rows** and change aggregation to **CNT(Quantity)**

3. Change Mark Type

- In the **Marks** card, select **Bar** (or keep Automatic if it shows bars).

4. Add Segment Colors

- Drag **Segment** to **Color** on the Marks card.

5. Show Values

- Drag **SUM(Quantity)** to **Label**
- Turn on **Show Mark Labels**.

6. Format the Chart

- Rename the title to **Histogram**
- Adjust colors, labels, and axis formatting as needed.

OUTPUT :

LINE CHART :

1. Synchronize the Axis Scales

- **The issue:** Sales (orange) and Profit (blue) share a single axis, which flattens the profit line at the bottom.
- **The fix:** Drag **Measure Values** out of Rows.
- **Action:** Place SUM(Sales) and SUM(Profit) directly next to each other in the Rows shelf to create a dual-axis chart, then right-click the right axis and select **Synchronize Axis** (or leave them independent if you want to see profit trends clearer).

2. Format Axis Labels and Suffixes

- **The issue:** The Y-axis is simply labeled "Value," which is generic.
- **The fix:** Right-click the Y-axis and select **Edit Axis**.
- **Action:** Change the title to "Amount (USD)" or your specific currency, and format the numbers to include currency symbols (\$) alongside the existing "K" shorthand.

3. Simplify the Color Palette

- **The issue:** The legend lists four different colors/shades for actuals vs. estimates, cluttering the view.
- **The fix:** Use two distinct primary colors (e.g., dark blue for Sales, dark green for Profit).
- **Action:** Use solid lines for "Actual" data and dashed lines or lighter opacity formatting for the "Estimate" forecast periods instead of entirely separate color entries.

4. Clean Up the Sheet Titles

- **The issue:** The chart header literally says "Line chart," which adds no value to the end-user.
- **The fix:** Double-click the title text box.
- **Action:** Rename it to something descriptive and action-oriented, such as "Sales & Profit Forecast through 2027."

5. Remove Gridlines and Zero Lines

- **The issue:** Horizontal gridlines compete with the trend lines, distracting the eye.
- **The fix:** Right-click anywhere on the chart background and select **Format**.

- **Action:** Go to the Lines tab and set **Grid Lines** and **Zero Lines** to "None" for a cleaner, modern look.

6. Relocate or Customize the Legend

- **The issue:** The legend on the right takes up valuable horizontal real estate, compressing the timeline.
- **The fix:** Move or integrate the legend.
- **Action:** Drag the legend card below the chart, or completely hide it and use color-coded text directly within your new descriptive chart title.

OUTPUT

BRAVO
— BUILDERS —

PACKED BUBBLE CHART

1. Open a New Worksheet
 - Go to a new sheet and select Show Me → Packed Bubbles.
2. Add Bubble Size
 - Drag Sales to Size on the Marks card.
3. Add Bubble Color
 - Drag Profit to Color to create the color gradient.
4. Add Labels
 - Drag Category and Region to Label to display names inside bubbles.
5. Add Detail
 - Drag Region (or another dimension if needed) to Detail for separate bubbles by category and region.
6. Format the Chart
 - Edit the title to Packed Bubble Chart.
 - Adjust label alignment, bubble size, and color legend for better readability.

OUTPUT

PIE CHART

1. Open a New Worksheet
 - From the Marks card, select Pie as the chart type.
2. Add Category Segments
 - Drag Category to Color.
3. Define Slice Size
 - Drag Profit to Angle to size each pie slice by profit.
4. Adjust Pie Size
 - Drag Profit to Size and increase the slider for a larger pie chart.
5. Show Labels
 - Drag Category to Label to display category names on the slices.
6. Format the Chart
 - Rename the title to Pie Chart and adjust colors/labels for clarity.

OUTPUT

SCATTER CHART

Step 1: Open a New Worksheet

- Create a new worksheet and rename it Scatter Chart.

Step 2: Add Measures to Axes

- Drag Sales to Columns.
- Drag Profit to Rows.

Step 3: Create Individual Marks

- Drag Category to Color.
- Drag Region to Detail on the Marks card.

Step 4: Set Mark Type

- From the Marks dropdown, select Circle (or keep Automatic if circles appear).

Step 5: Format the Scatter Plot

- Adjust the Size slider if needed.
- Ensure each point represents a Region within a Category.

Step 6: Add Trend Lines

- Go to Analytics pane.
- Drag Trend Line → drop on Per Color to create separate trend lines for each category.

Step 7: Final Formatting

- Add the title Scatter Chart.
- Show the Category color legend.
- Format axis labels (Sales and Profit) and gridlines as required.

OUTPUT

Text Table with percentages

Step 1: Create a New Worksheet

- Open a new sheet and rename it Text Table with Percentages.

Step 2: Build the Table Structure

- Drag YEAR(Order Date) to Columns.
- Drag Region and Sub-Category to Rows.

Step 3: Add the Measure

- Drag Sales to Text on the Marks card.
- A text table (crosstab) is created.

Step 4: Convert Values to Percentages

- Right-click SUM(Sales) on the Marks card.
- Select Quick Table Calculation → Percent of Total.

Step 5: Configure the Calculation

- Right-click the field again → Edit Table Calculation.
- Set Compute Using to the required direction (e.g., Table Across for yearly percentages).

Step 6: Format the Percentage Table

- Right-click any value → Format.
- Change Numbers to Percentage and adjust decimal places.
- Edit the title to Text Table with Percentages.

OUTPUT

The screenshot shows the Tableau interface with a text table visualization. The table is titled "Text Table with percentages". The columns are Region, Sub-Category, and Order Date (years 2023, 2024, 2025, 2026). The rows are grouped by Region (Central, East) and Sub-Category. The values represent the percentage of total sales for each sub-category in each year.

Region	Sub-Category	2023	2024	2025	2026
Central	Accessories	4.439	7.795	10.802	10.920
	Appliances	3.659	4.975	6.016	8.933
	Art	822	1.132	1.520	2.291
	Binders	15.871	5.891	15.149	21.150
	Bookcases	1.834	8.298	8.385	5.640
	Chairs	20.754	17.909	23.397	23.881
	Copiers	3.270	12.810	17.500	3.680
	Envelopes	1.599	871	971	1.197
	Fasteners	122	89	247	320
	Furnishings	2.536	2.529	5.132	5.088
	Labels	1.048	305	511	587
	Machines	16.292	1.852	2.659	5.995
	Paper	2.347	3.544	5.366	6.235
	Phones	9.926	19.364	19.902	23.211
East	Storage	11.093	8.331	12.831	13.727
	Supplies	440	324	4.295	4.408
	Tables	7.785	6.857	13.923	10.589
	Accessories	6.054	17.911	6.231	14.837
	Appliances	6.139	6.699	9.541	12.412
	Art	1.370	1.777	2.022	2.748
	Binders	7.319	14.417	19.760	14.807

Tree map

Step 1: Create a New Worksheet

- Open a new sheet and rename it Tree Map.

Step 2: Select Treemap

- Click Show Me → choose Treemap.

Step 3: Define Rectangle Size

- Drag Sales to Size on the Marks card.

Step 4: Add Color and Labels

- Drag Profit to Color.
- Drag Sub-Category to Label.

Step 5: Format the Visualization

- Adjust colors, labels, and tooltip settings.
- Add the title Tree Map.

OUTPUT

DONUT CHART:

- **Color Slices:** Drag Region to Color on the first card.
- **Label Slices:** Drag Region and Sales to the Label shelf.
- **Set Angles:** Drag Sales directly onto the Angle shelf.
- **Select Center:** Click the second SUM(Zero) Marks card.
- **Center Value:** Drag Sales to Label on this second card.
- **Edit Text:** Click Label, click (...), and type "Total Sales".

OUTPUT:

— BUILDERS —

Map Chart

Step 1: Create the Map

- Double-click State/Province.
- Tableau automatically generates Longitude (generated) and Latitude (generated) to create the map.

Step 2: Add Geographic Detail

- Drag State/Province to Label to display state names on the map.

Step 3: Color by Measure

- Drag Sales to Color on the Marks card.
- A color gradient will represent sales performance by state.

Step 4: Display Sales Values

- Drag Sales to Label (or Text) to show sales figures on each state.

Step 5: Format the Map

- Add a title (Map Chart).
- Show the Sales color legend and adjust label formatting for readability.

OUTPUT:
