

Plugging into the Future: An Exploration of Electricity Consumption Patterns

TEAM ID	SWTID-2026-7684
PROJECT TITLE	Plugging into the Future: An Exploration of Electricity Consumption Patterns
MAX MARKS	4 MARKS

2.2 – Empathy Map Canvas

An Empathy Map Canvas helps understand the needs, thoughts, behaviours, and challenges of users involved in electricity consumption analysis.

1. Says

- “How can electricity usage be reduced efficiently?”
- “What are the major factors affecting electricity consumption?”
- “Can future energy demand be predicted accurately?”
- “I need clear visual insights to make decisions.”

2. Thinks

- Wants better understanding of electricity usage trends.
- Thinks data visualization can simplify complex information.
- Considers sustainable energy practices important.
- Looks for reliable forecasting and analysis’s

3. Does

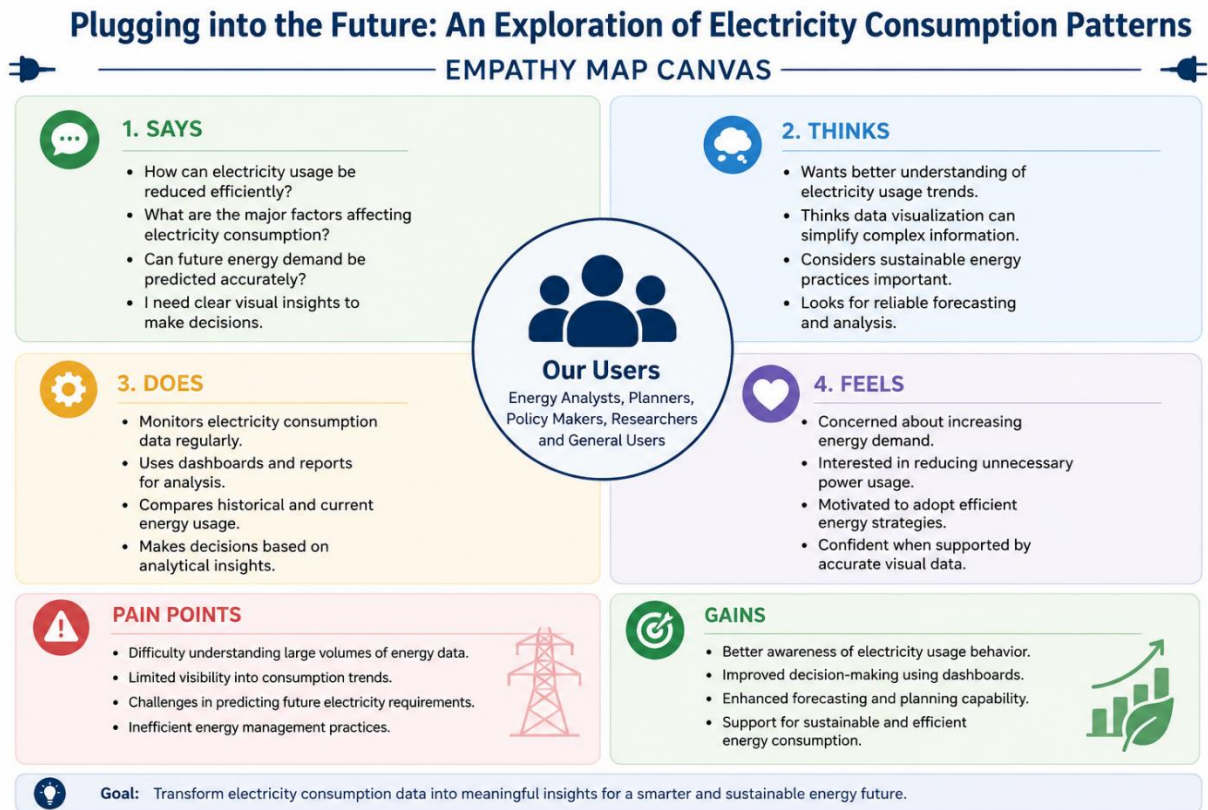

- Monitors electricity consumption data regularly.
- Uses dashboards and reports for analysis.
- Compares historical and current energy usage.
- Makes decisions based on analytical insights.

4. Feels

- Concerned about increasing energy demand.
- Interested in reducing unnecessary power usage.
- Motivated to adopt efficient energy strategies.

Plugging into the Future: An Exploration of Electricity Consumption Patterns

- Confident when supported by accurate visual data.
