

Plugging into the Future: An Exploration of Electricity Consumption Patterns

TEAM ID	SWTID-2026-7684
PROJECT TITLE	Plugging into the Future: An Exploration of Electricity Consumption Patterns
MAX MARKS	2 MARKS

CHAPTER – III

REQUIREMENT ANALYSIS

3.1 – Customer Journey Map

Plugging into the Future: An Exploration of Electricity Consumption Patterns

Plugging into the Future: An Exploration of Electricity Consumption Patterns

1. Structure the Outer Circular Loop

- Create a Ring Layout: Arrange 6 custom step containers in a wide oval or circular shape around the canvas perimeter.
- Insert Directional Arrows: Connect each step to the next using thick, curved dark-blue arrows pointing clockwise to form a continuous loop.

2. Centrepiece and Project Goal

- Add Central Artwork: Place an illustration of a power grid tower, wind turbines, and solar panels in the dead centre.
- Place the Goal Box: Position a distinct light-green rectangular box directly underneath the power grid illustration.
- Define the Mission: Type the core objective: *"To analyse and visualize electricity consumption patterns to derive insights that support better energy management and informed decision-making."*

3. Build Header and Upper Phase Nodes

- Add Master Title: Write the two-line bold title at the very top: *"Plugging into the Future: An Exploration of Electricity Consumption Patterns."*
- Node 1 (Measure & Develop): Top-left. Add a bar chart icon. Define data collection, cleaning, and preparation from 2019–2020.
- Node 2 (Assess & Segment): Top-right. Add a user segmentation icon. Define analysing key needs across states, regions, and years.

4. Build Middle Phase Nodes

- Node 3 (Map Journey): Middle-right. Add a green map pin icon. Define looking at consumption across states, regions, and before/after lockdown periods.
- Node 4 (Identify Experience): Bottom-right. Add a line graph magnifying glass icon. Define delivering an interactive dashboard with exploration filters.

5. Build Lower and Left Phase Nodes

- Node 5 (Design Experience): Bottom-left. Add a desktop monitor dashboard icon. Define designing user-friendly Tableau dashboards with easy navigation.

Plugging into the Future: An Exploration of Electricity Consumption Patterns

- Node 6 (Structure Touchpoints): Middle-left. Add a blue stacked database cylinder icon. Define MySQL integration with Tableau for seamless deployment across devices.

6. Format Text Typography

- Style Headings: Use a bold, modern sans-serif font in dark blue for the main title and all 6 step headers.
- Style Subtitles: Use teal/light blue text specifically for the step action labels (e.g., *"Assess needs and segment customers"*).
- Style Descriptions: Keep the descriptive body paragraphs beneath each node in a clean, dark-grey font.

7. Balance Colours and Alignment

- Apply Colour Palette: Restrict the design to a cohesive palette of dark blue, teal, light green, and white.
- Verify Layout Balance: Ensure the central power grid illustration fits evenly between the left and right columns of nodes.
